ABSTRACTS AND CURRENT PAPERS JOURNALS

Three main subject areas are covered by INSPEC abstracts and current papers journals: physics, electrical and electronics engineering, and computer and control engineering. For each field an abstracts journal and a companion titles journal are published. The abstracts journals are intended as library tools for retrospective information retrieval, whereas the companion titles journals, which omit the abstracts and associated indexes, are intended as low-cost current-awareness tools for the individual.

SUBSCRIPTION PRICES

ABSTRACTS JOURNALS	Annual subscription Paper or microfiche	Annual subscription Combined paper and microfiche
Physics Abstracts (PA) Published every two weeks in conjunction with the American Institute of Physics, New York, and the Institute of Physics, London	£130	£195
Electrical & Electronics Abstracts (EEA) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£105	£157
Computer & Control Abstracts (CCA) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£55	£82
Combined Subscription to Electrical & Electronics Abstracts and Computer & Control Abstracts (EEA/CCA)	£135	£202

CURRENT PAPERS JOURNALS	Annual subscription IEE, AIP, IEEE, IOP, IERE members	Annual subscription Non-members
Current Papers in Physics (CPP) Published every two weeks in conjunction with the American Institute of Physics, New York, and the Institute of Physics, London	£7	£14
Current Papers in Electrical & Electronics Engineering (CPE) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£7	£14
Current Papers on Computers & Control (CPC) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£6	£12

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts*, and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966–68. The table below shows the prices and periods for the two types of cumulative index.

	Physics Abstracts		Electrical & Electronics Abstracts		Computer & Control Abstracts	
	Subject	Author	Subject	Author	Subject	Author
1955–59	£20	£20	£15	£20	—	—
1960–64	£40	£17	£20	£12	—	—
1965–68	£60	—	£35	£20	—	—
1966–68	—	—	—	—	£15 (combined)	

ORDERING PROCEDURE

AMERICAN SUBSCRIPTIONS

Physics Abstracts
Current Papers in Physics

For AIP members, wherever they reside, and from the public in the Americas, to the Subscription Department, American Institute of Physics, 335 East 45th Street, New York, NY 10017, USA. Please allow six weeks' notice for change of address, send both old and new addresses and include an address label from a recent issue.

Electrical & Electronics Abstracts
Computer & Control Abstracts and associated current papers journals in these fields

For IEEE members wherever they reside, and from the public in the Americas, to the Fulfillment Manager, Institute of Electrical & Electronics Engineers Inc., 345 East 47th Street, New York, NY 10017, USA.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC database. Information is dispatched weekly on 150 mm × 100 mm (6″ × 4″) cards.

TOPICS

This is an SDI service based on standard profiles. There are 72 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

These are produced, containing all the information included in the INSPEC publications. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

REFERENCES.

2277. *Electrodynamics of Moving Bodies.* **A. Einstein.** (Ann. d. Physik, 17. 5. pp. 891–921, Sept. 26, 1905.)—A mathematical investigation divided into a kinematical and an electrodynamical part. The former treats (1) Definition of contemporaneousness (Gleichzeitigkeit), (2) The relativity of lengths and times, (3) Theory of space- and time-transformations from resting to uniformly translated systems, (4) Physical significance of the equations obtained for moving rigid bodies, &c., (5) Addition theorem for velocities. The second part deals with (6) Maxwell-Hertz equations, (7) Doppler's principle and aberration, (8) Transformation of energy of light, Theory of radiation pressure on a perfect reflector, (9) Transformation of Maxwell-Hertz equations with reference to convection currents, (10) Dynamics of slowly accelerated electrons. ...you probably missed this Science Abstract

Einstein's paper on the special theory of relativity, published in September 1905, is only one of the many vital papers which have appeared in Science Abstracts since they began publication in 1898.

You can forgive yourself for missing that one, but are you sure there are no other knowledge gaps in your literature searches?

If there are, back issues of Science Abstracts will fill those gaps.

Abstracts journals, containing titles, authors, abstracts, together with information necessary to locate the source of the original document, are produced in three separate publications: Physics, Electrical & Electronics and Computer & Control Abstracts. They are also published in concurrent microfiche form.

Back issues of Science Abstracts can do for you what the apple did for Newton!

To obtain a quotation for supplying your missing issues, please write to:
